

OUR MISSION STATEMENT:

Liberty Veterinary Hospital strives to create a state-of-the-art pet care facility that meets all of our clients' & pets' needs from nutritional supplies, boarding and grooming to the highest level of medical and surgical care. Because our team can only be as good as the sum of its parts, we nurture and educate our staff so that we may all provide uncompromising service, compassion, kindness and caring for each patient as a member of our own family.

JUNE IS PUPPY AND KITTEN WELLNESS MONTH

Liberty Adoption Cats

Need a kitten? Come visit our cat adoption aquarium. We usually have a number of super loveable kitties that are seeking loving homes!

All of our adoption kittens have been examined by one of our qualified Veterinarians. Included in the adoption fee are the vaccines needed for their age, combo test and a spay or neuter.

Call or speak with a receptionist to make an appointment with our adoption coordinator. They will be able to answer any questions you may have. Cast your line and catch a new fuzzy friend!

New kittens expected as soon as 6-3-11!

Dear Friend,

Did you know that Puppies and Kittens, unlike older pets, need to have a series of vaccines in the first few months of life? When a puppy or kitten is born, most of their immune system comes from their Mom. More than 90% of their antibodies (the part of the immune system that remembers certain diseases and combats them) are obtained from the mother's milk. Between 6-16 weeks of age, puppies and kittens will begin maturing and developing their own antibodies. At the same time, the antibodies they have received from their mother is declining. Vaccinating begins at 7-9 weeks of age followed by booster vaccines every 3-4 weeks to strengthen the immune system. On average, a puppy or kitten will need 4 trips to their veterinarian for all their "shots" within the first 4 months at which time their immune system is then "mature."

Liberty Veterinary Hospital feels strongly about the importance of getting your new pet off to the best start possible. Because of that, we offer a **Puppy Wellness** and **Kitten Wellness** plan to provide your new pet with a quality life and to minimize the risk of disease that can be prevented through vaccinations, blood tests, deworming, spaying/neutering and regular physical exams.

Each plan includes a recommended schedule of services which begins with a physical exam, vaccines, fecal analysis, deworming, nail trim and the first introduction of heartworm prevention which will be important year round. Thereafter, physical exam and vaccine visits are every 3-4 weeks and usually completed at 16-19 weeks of age. In addition, our plans include a 10% savings on services such as spay and neuter (before 7 months of age), declaws, kennel cough vaccine, dental prophylaxis/extraction of baby teeth, microchip, puppy grooming (available till 6 months of age) and heartworm and flea/tick prevention.

The value of these services exceeds \$650, but are discounted at a 25% savings to you of only \$485 for a puppy and \$405 for a kitten when a plan is purchased. When you come for your first visit and purchase a plan you will receive a puppy or kitten kit, CET toothpaste and finger brush kit, a free dose of parasite prevention and educational material. The plan's discounts expire 1 year from the date of purchase and cover preventative services only, not illnesses.

Please ask us if you have any questions. Our staff is always ready to help!

Amy L. Johnstone, DVM Robyn T. Collins, DVM Holly F Gossett, DVM

Did You Know ...

- We offer dog obedience class recommendations
We offer full grooming, boarding and surgical services
